

ELONGATED COINS

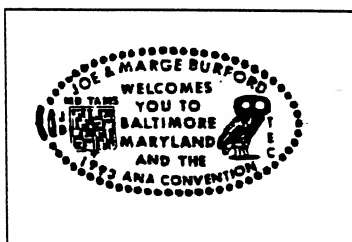

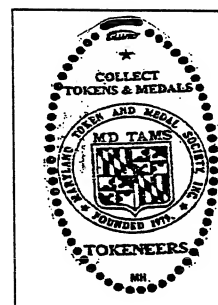

b y

JOE BURFORD

of maryland

PART FOUR

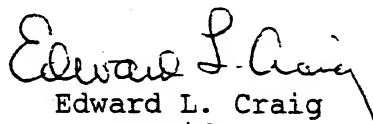

PREFACE

On behalf of the Maryland Token and Medal Society (MD TAMS), I would like to take this opportunity to thank one of our loyal and supportive members, Mr. Joseph J. Burford. Joe like most hobbyists enjoys collecting and the thrill of the hunt for that new item for his collection. As many folks know, Joe is very active in collecting elongated coins, particularly those from a Maryland source or those with Maryland themes. Thankfully for our hobby, Joe is a sharing collector. Several local collectors share their finds with others and pick up new items for people without being asked. Joe has shown an even deeper commitment to the hobby, one that few are inclined to pursue. Joe does much research to find out about items and has been diligent about documenting his findings. For groups like MD TAMS and TEC (the Elongated Collectors) organization to which both Joe and several other MD TAMS collectors belong, these activities are paramount. If someone does not take the time and effort now to document and catalog the areas and items that are at the center of both our hobby's enjoyment and education, so much will not be shareable with others. This is especially true concerning younger collectors who may not even be part of the hobby today. Also, without this historical view, much of this data could be lost forever.

In the succeeding pages you will find the first attempt by Joe to capture the history of Maryland Elongateds. The content of the work speaks for itself. Joe has spent many long hours cataloging Maryland Elongateds and has donated this manuscript to MD TAMS in an attempt to share this important compilation of data. The Maryland Token and Medal Society in keeping with its goals of promoting the hobby and helping educate fellow collectors is honored to financially support the publishing of this manuscript. Looking forward a bit, it is Joe's and MD TAMS intent to reissue this publication in a few years; hopefully, even more complete than it is now. That is where we would like your support. As you enjoy reading this superb new, reference; please let us know if you have items that are not listed herein or are different varieties of the ones listed. Your help will be greatly appreciated and will help make the next reference more complete. Please send your data to the following address:

Maryland Token & Medal Society
PO Box 644
Gambrills, Maryland 21054-0644
ATTN: Mr. Joe Burford

Once again, many thanks to not only Joe but his wife, Marge whose understanding and support made much of this possible.

Edward L. Craig
President

Maryland Token & Medal Society

ACKNOWLEDGMENTS

I would like to thank everyone that has helped me put this book together. Doug Fairbanks Sr. Who gave me a list of all the Maryland elongateds in his collection. I now have added these to in my collection. Millard Hajek who started cataloging elongated coins in The Maryland TAMS Journal. And he let me use some of the things that he did. Jim Dundon who let me know about some of the elongateds he made for Maryland, then I had to go out and find them. Raymond Dillard who let me take care of the TEC booth at the ANA Convention, where I got to use his machine for 3 to 4 days. I still would like to have one, maybe someday. Angelo Rosato and his book. When you were in school you had books to go to and for elongates, Angelo's Encyclopedia is the book to go to. Lee Martin whose pamphlets had a lot of Maryland elongateds in them. The late Chet Rogers for when I bought elongateds from him, he would always write a letter and let me know of some of the things that he did over the years. You can find some of his letters in the book of his works by Don Wilkinson. Don let me roll my first cent on his machine at the ANA in Pittsburgh. The late Frank Brazzell did a lot of the Maryland elongateds. Also he put most of his elongateds on pages and would send them to you if you asked for them. The last pages that he did were pictures only, and he said that he just did not have time to type it up. Lynn Hughson of Eurolink who sent me some of the pictures of the Zoo elongateds. And DOTTIE DOW for her first book which started all of the books. Then DOTTIE DOW and LEE MARTIN on the second book. I used their numbering system. A special thanks goes to Edward Craig and Millard Hajek who proofread this book and found a few changes and add some thing that I missed. THANKS TO BOTH OF YOU! Also, thanks to

JACK PRYOR

WILLY MASSEY

RUSS SEARS

ROCKY ROCKHOLT

FORWARD

I am changing some of the numbering system that Millard Hajek used in the Maryland TAMS Journal. He also changed the clubs and some of the organizations and put them in the Maryland Social section. This has made it a lot easier to find. The miscellaneous list is mostly of Maryland in general. The maverick list is mostly people and places. In the right hand corner of each elongated section you will see this diagram the first square is for cent then five, ten, twenty-five, fifty and one dollar. When you see a letter in one of the squares, The "F" stands for Foreign coins, "T" for Tokens, "C" for Canceled, "D" for Doubloons, "B" for Brass, "P" for Planchet, "pb" for Pin Back, The second row is for you to add a mark to let yourself know that you have that one in your collection.

1	5				\$	F	T
X					X		X

At the upper left hand corner is the numbering system. Like MD.ANA-1. The designation after that [CMR-383] [ROG-440] is the numbering system given by other authors and dealers.

Some of the pictures are Xerox copies, and some are pictures of the art work. Also, some of the pictures are missing Ray Dillard's initials because the art work is the original before Ray added his initials and changed some of the art work to make it look better.

When I was a kid, I put cents on the streetcar tracks. Then we would look for them. When I got older we would go down to the railroad tracks, which was part of the Mount Clair Station, and put cents on the railroad tracks and wait for a train to come by. Then we would look for a long time just to find the cent, most of the time we did not find the cent. Also, when I was ten years old I saw my first elongated machine, It was on Baltimore Street by THE BLOCK and it had the Lords prayer in it.

I would like to thank my wife "Marjorie" for putting up with me for the hours it took to put this together.

I am starting on the supplement to this book. If you know of any that I have missed you can send the information to MD TAMS, P. O. BOX 644 GAMBRILLS, MD. 21054-0644 in care of JOE BURFORD and I will add them in the next supplement.
